TECHNICAL SKILLS

Language: TypeScript, JavaScript, Python, Java, SQL.

Backend: NestJS, Node.js, Express.js, Django, RESTful APIs, DDD Architecture.

Frontend: Next.js, React.js, Tailwind CSS, ShadCn, Tanstack Query

Databases/Tools: PostgreSQL, MongoDB, Git, CI/CD basics.

PROFESSIONAL EXPERIENCE

Software Engineer

ILM AI Ltd

May 2025 – present
Bedfordshire, United Kingdom

ILMINO — AI-Powered EdTech Platform 📄

- Led frontend development for dashboards and topic-based learning workflows using Next.js and TypeScript, supporting hundreds+ active learning sessions.
- Designed and implemented a unified quiz and AI-based evaluation system supporting 8+ question types with real-time feedback and scoring visualization.
- Integrated and customized interactive canvas functionality (tldraw-based) to enable in-lesson writing and structured, step-by-step problem-solving.
- Built AI-assisted evaluation pipelines where handwritten or typed answers are captured as images and evaluated with structured feedback.
- Migrated backend services from Express.js to NestJS, improving modularity, scalability, and maintainability.
- Executed a MongoDB → PostgreSQL migration, redesigning relational schemas and optimizing queries for analytics-heavy workloads.
- Integrated custom simulations and animations (PhET-like) to improve conceptual understanding in complex topics.

MathPilot — AI-Based Mathematics Learning Platform 📄

- Developed a structured learning flow allowing users to select subjects, modules, papers, and topics, each containing step-wise descriptive questions.
- Designed and implemented a custom three-column problem-solving layout (question, canvas, navigation) optimized for mathematical workflows.
- Built a custom canvas system supporting dynamic sizing, multi-page workflows, and improved rendering performance.
- Implemented an AI evaluation pipeline providing step-by-step structured feedback for student solutions.
- Developed student analytics dashboards for subject-wise progress tracking, exam history, marks breakdown, and performance insights.

Software Engineer

mPower Social Enterprise Ltd

January 2024 – June 2025

Edmate — EdTech Learning & Management Platform 📄

- Developed teacher and admin dashboards for class scheduling, content management, and role-based access control.
- Implemented quiz and question modules allowing admins to create MCQs and students to view instant results.
- Built backend services following Domain-Driven Design (DDD) principles, improving separation of concerns and long-term maintainability.

- Built admin panels for content creation, notification scheduling, and user management.
- Implemented feedback systems and managed livestock disease and information modules.
- Designed backend features using DDD-aligned service layers to support scalable content and user workflows.

Adjunct Lecturer, CSE Department

October 2024 – present

BRAC University

- Teaching undergraduate courses in Software Engineering, Data Structures & Algorithms, Databases, and System Analysis & Design to 100+ students per semester.
- Delivering both theory and lab sessions, guiding students through real-world system design and implementation patterns.
- Mentoring students on clean code, problem-solving, and architectural thinking, strengthening foundational CS skills.

EDUCATION

Bachelor of Science in Computer Science (CS)

July 2020 – January 2024

BRAC University

- **Grade:** 3.90 out of 4

THESIS

Classification of Retinal Diseases from OCT Images Using Deep Learning Models

- Developed a custom 10-layer Convolutional Neural Network (CNN) for retinal disease classification, achieving 95.05% accuracy.
- Implemented Grad-CAM for explainability, enhancing model interpretability for healthcare professionals.
- Compared performance against pre-trained models (VGG16, ResNet50, DenseNet121, Inception V3).
- Applied data augmentation techniques to overcome class imbalances and improve dataset robustness.
- Created a web application for live visualization of classification results.

CO-CURRICULAR ACTIVITIES

Assistant Director, Creative Department

August 2022 – October 2023

BRAC University Computer Club (BUCC)

- Conducted the administrative works for 1000+ members.
- Organized campaigns with Robi Axiata, Grameenphone and Shikho.

RS Activity Instructor (Web Development),

BRAC University

- **Beginner Batch:** Taught students HTML, CSS, and guided them in building a web development project.
- **Advanced Batch:** Taught JavaScript and React, and led students in developing a "Mini Bank" project using HTML, CSS, and JavaScript.
